

Traffic Safety Grant Opportunities for Federal FY 2018

Governor John Bel Edwards
Governor

Katara A. Williams, Ph.D.
Executive Director

Thank you for your interest in promoting traffic safety in Louisiana! The Louisiana Highway Safety Commission (LHSC) is seeking dedicated partners to enhance our mission of Changing Behaviors and Saving Lives. Please take a moment to peruse the requirements for grant submissions and let us know if you have any questions. Questions concerning the application process may be directed to the LHSC by email at: lyrica.johnson@la.gov or by telephone at (225) 925-6991.

The Louisiana Highway Safety Commission is committed to reducing deaths and injuries on our highways, ultimately to preserve the lives of Louisiana's citizens. LHSC administers the State's highway safety grant program. Programs and projects are administered in accordance with uniform guidelines promulgated by the National Highway Transportation Safety Administration (NHTSA), Federal Highway Administration (FHWA), and the State of Louisiana.

In December 2015, Congress passed the Fixing America's Surface Transportation (FAST) Act. LHSC adheres to the regulatory requirements in accordance with the FAST Act which governs federal traffic safety funding beginning in Federal FY2018. NHTSA funding for Section 402 (State and Community Highway Safety Programs) and Section 405 grants are available in the following areas: Occupant Protection, State Traffic Safety Information System Improvements, Impaired Driving Countermeasures and Motorcycle Safety.

Who May Apply:

Local, parish and state government agencies; non-profit organizations; universities or other institutions of higher learning; local school boards or schools; corporations; hospitals; highway safety advocacy groups; individuals.

Application Process:

Application packages are available on-line at: <http://www.lahighwaysafety.org>.

The application is an on-line form and detailed instructions are included. The *application deadline is March 26, 2017*. All applications must be submitted electronically according to the instructions no later than midnight on March 26, 2017. Failure to submit or follow other instructions in the application package may result in your application being rejected. Please make sure you receive a message saying your form was successfully submitted as well as a confirmation e-mail.

Funding Period:

The funding period for this grant begins on October 1, 2017 and ends on September 30, 2018.

Selection Criteria:

Proposals for funding will be based on merit selection and the needs of the LHSC.

Factors considered in the selection process include, but are not limited to, all sections of the application package, high-risk locations and populations, past performance on prior LHSC grant programs, population serviced by the project, innovation, and the potential to contribute to meeting LHSC goals.

Preference will be given to proposals that include evidence-based and data-driven projects. Proven evidence based projects may be found in the NHTSA Publication *Countermeasures that Work: A Highway Safety Countermeasure Guide For State Highway Safety Offices* which may be found at: <http://www.ghsa.org/html/publications/countermeasures.html>

Funding decisions by the LHSC are final and not subject to appeal. Priority will be given to parishes identified as high-risk.

Eligible Projects:

Projects eligible for funding must be directly related to highway safety and support at least one of the LHSC performance targets listed below. The LHSC will consider proposals for any project related to traffic safety that supports these performance targets. Possible project proposals could include, but are not limited to, education, outreach, prevention and enforcement.

LHSC Performance Targets:

General

To reduce the number of total traffic fatalities

To reduce the number of serious injuries

To reduce the fatality rate per 100 Million Vehicle Miles Traveled (M VMT)

To reduce the rural fatality rate per 100 M VMT

To reduce the urban fatality rate per 100 M VMT

Alcohol

To reduce alcohol impaired fatalities

Occupant Protection

To increase the statewide observed seat belt use of front seat outboard occupants in passenger vehicles

To reduce unrestrained vehicle occupant fatalities

Motorcycle

To reduce motorcycle fatalities

To reduce unhelmeted motorcyclist fatalities

Pedestrian

To reduce pedestrian fatalities

Bicycle

To reduce bicycle fatalities

Speed

To reduce speed related fatalities

Young Drivers

To reduce fatal crashes involving young drivers

Railgrade

To reduce railgrade fatalities

Priority Locations/Problem Identification:

An analysis of traffic crashes in Louisiana has identified the high-risk areas of the State. These high-risk areas are divided into Tier 1, representing the highest 25% and Tier II, representing the next highest 25%. Projects impacting these high-risk areas will be given priority for funding.

A detailed analysis of the State's problem identification, including the raw crash data, is attached to this document and is also available on the LHSC website at: <http://www.lahighwaysafety.org>.

Specific Traffic Safety Programs:

In addition to other projects addressing any of the above performance targets, the LHSC also seeks proposals for the following specific traffic safety programs:

Law Enforcement Grants:

Law enforcement grant applications should primarily focus on enforcement overtime for occupant protection and impaired driving. Limited funds may also be available for overtime to enforce speeding/aggressive driving laws and Juvenile Underage Drinking Enforcement (JUDE). Priority for year-long sustained enforcement grants are given to agencies located in parishes identified above as high-risk.

All law enforcement agencies are encouraged to submit proposals supporting the national "Click It or Ticket" (occupant protection) and "Drive Sober or Get Pulled Over" (impaired driving) campaigns. Overtime funding to participate in these two campaigns is available for any agency wishing to participate.

Regional Coalitions and Safe Community Groups

Local community groups and partners play a major role in promoting and enhancing traffic safety.

The LHSC seeks applications to fund specific traffic safety programs or projects that address at least one of the LHSC performance targets and is considered a strategy within at least one of the Coalition's Emphases Areas. Applications that include administrative costs to implement and manage a specific program are allowed by LHSC.

Grant applications submitted by a Regional Traffic Safety Coalition must be approved by the Coalition prior to receiving a final award. The LHSC recognizes that a Coalition meeting may not be possible during the application period. However, the application must be approved by the Coalition prior to a final award.

Traffic Records

The LHSC supports traffic records strategies to:

- Improve the timeliness, accuracy, completeness, uniformity, integration, and accessibility of the safety data that is needed to identify priorities for state and local highway and traffic safety programs;
- Evaluate the effectiveness of efforts to make such improvements;
- Link data systems, including traffic records, with other data systems within the State, such as systems that contain medical, roadway, and economic data; and
- Improve the compatibility and interoperability of the data systems to enable the state and local communities to observe and analyze trends in crash occurrence rates, outcomes, and circumstances.
 - o Examples of traffic records programs are laptop or desktop computers for crash reporting, traffic citation processing enhancements, wireless access points for electronic transmission of crash data from police vehicles, and any other project that would improve the collection, accuracy, timeliness, or completeness of traffic records.

Applications concerning traffic record grants should be made directly to the Traffic Records Coordinating Committee using the forms and instructions found at:

<http://latrcc.lsu.edu/funding.aspx>

Young Drivers

The LHSC is interested in comprehensive proposals to support traffic safety programs in high schools and/or colleges and universities.

Pedestrians

The LHSC is seeking innovative education and outreach projects directed at reducing pedestrian injuries and fatalities from East Baton Rouge, Orleans, and Jefferson Parishes.

Distracted Driving

The National Highway Traffic Safety Administration and the LHSC believe that distracted driving is a serious, life-threatening practice. The LHSC seeks proposals for innovative outreach, education and/or enforcement programs to combat distracted driving.

Higher Education Systems

Louisiana's colleges and universities are encouraged to submit proposals in the program areas of occupant protection and alcohol/impaired driving. Historically Black Colleges and Universities are specifically encouraged to submit proposals. The LHSC seeks proposals specifically related, but not limited to, traffic safety awareness/education for incoming freshmen.

Pickup Truck Occupant Protection

The observed safety belt usage data indicates that pickup trucks consistently have a lower rate of safety belt usage. The LHSC welcomes applications that will provide specialized enforcement and/or innovative pilot programs to address underutilization of safety belts in pickup trucks,

especially at night. All year-long occupant protection law enforcement grants will contain mandatory support for the annual Buckle Up In Your Truck Campaign.

Minority Outreach

Recent seat belt observation surveys indicate that African-Americans use their safety belts at a rate lower than the State average. The LHSC seeks innovative, comprehensive education and outreach proposals related to increasing the safety belt usage rate of African-Americans.

Motorcycles

The LHSC believes that motorcycle traffic crashes can be reduced through education, enforcement and outreach. The LHSC supports strategies to promote motorcycle rider education, proper driver licensing (a recent LHSC study indicated that only 65% of all motorcycle operators involved in fatality or serious injury crashes over the past three years possessed the proper motorcycle endorsement), reducing the number of impaired motorcyclists, increasing motorist awareness of motorcycles, and increasing helmet use.

PLEASE NOTE: NHTSA IS NO LONGER ALLOWING THE PURCHASE OF COMMODITIES FOR ANY REASON

IMMEDIATE CHANGE: On April 29, 2015, NHTSA announced that all promotional (incentive) items (such as, trinkets, key chains, t-shirts, hats, mugs and bumper stickers) are not allowed to be federally funded. Please do not include this in any proposals. The NHTSA interpretation of the Federal law (Super Circular) has changed. Printed educational and advertising materials, such as, posters, flyers, and booklets, can continue to be purchased with Federal funds.

Questions concerning the application process may be directed to the LHSC by email at: lyrica.johnson@la.gov or by telephone at (225) 925-6991.

Frequently Asked Questions

Q. Will the LHSC fund grant applications for paid media advertising?

A. No. The LHSC uses a single vendor to place all paid media messaging to ensure consistency and increase purchasing power.

Q. Do I need to complete the Budget Narrative form in the application?

A. Yes. The Budget Narrative is mandatory. Failure to complete the Budget Narrative will cause your application to be labeled incomplete.

Q. If I have a current grant from the LHSC do I need to submit an application for FFY17 or will my grant be automatically renewed?

A. Everyone seeking a grant for FFY17 must submit an application.

Q. How do DWI Courts submit their applications?

A. Currently funded DWI Courts with a subgrant from the Louisiana Supreme Court will submit their applications to the Supreme Court. DWI Courts currently administered by a District Attorney who receives a direct grant from the LHSC will submit directly to the LHSC.

Q. Where do I find examples of proven, evidence based traffic safety programs?

A. The NHTSA Publication *Countermeasures that Work: A Highway Safety Countermeasure Guide For State Highway Safety Offices* may be found at:
<http://www.ghsa.org/html/publications/countermeasures.htm>
